ForTheRecord® (FTR) digital recording and content management solutions adopted by every provincially-managed courtroom in Western Canada

Phoenix, AZ, July 13, 2010 — ForTheRecord (FTR), a global leader in digital recording and content management solutions for judicial and public safety venues, today announced the Province of Manitoba in Western Canada has now adopted the FTR Gold® suite of products for each of the 134 courtrooms across the entire province. All 959 provincially-managed court rooms and hearing rooms in Western Canada are now using FTR solutions to digitally capture and manage their court proceedings.

FTR Reporter™ (v5.3) and TheRecord™ Manager were the two key products from the FTR Gold® family that were purchased by the Province of Manitoba over the last eight months with the assistance of local Canadian partner, Acrodex, Inc. "With these products, the client has an end-to-end FTR solution - from capturing the record of proceedings to being able to seal, archive, duplicate, retrieve and otherwise manage the content," said Daniel Bennett, Executive Vice President of FTR. "Using one vendor for the entire process eliminates the risk of incompatible systems and streamlines operation, maintenance and support for the client," he said.

"The fact that all courtrooms across Western Canada are using FTR solutions speaks to the quality of our products and the strength of our brand," continued Daniel Bennett. "FTR is now the number one vendor by total provinces and courtrooms in Canada, which ensures the company's presence in the region for years to come."

FTR's dominant position in the Court market will enable it to continue its successful expansion into the adjacent Hearings and Law Enforcement markets in the region.

ENDS.
