Recommended Workstation System Requirements

- CPU: Intel® Core™ i5 Processor or equivalent
- Memory: 2GB
- Display: 1024 x 768
- Network connection for access to on-line archive
- CD or DVD recordable drive or removable storage drive for off-line storage

Recommended Server System Requirements

For small installations, an existing Windows® server can be sufficient depending on pre-existing load.

For larger installations, FTR recommends:

- CPU: Intel® Xeon® Processor with more than one core or equivalent processor.
- Memory: 8GB
- Network: 1000 Mbps (1 Gigabit)

NOTE: As with any software there are hardware and software requirements which need to be in place prior to installing and using FTR software. While this list shows the recommended system requirements, it is important to be aware that using additional programs may require a higher specification. For advice on the suitability of a specific system configuration, please contact FTR sales.
