

FTR Monitor™ is a software solution designed for courts that want to centrally monitor and remotely control proceedings that are being recorded using FTR Reporter™ in multiple courtrooms. In addition, it incorporates all of the functionality found in companion applications such as TheRecord Player™ - our premier playback application - and FTR Log Notes®, our electronic note-taking program. Features of FTR Monitor include:

- Live listen
- Vertical audio bar
- 4-channel isolation
- Confidence monitoring
- Windows 7® compatibility
- Remote start/stop of recordings
- Individual channel volume control

KEY FEATURES

- Live listen
- Audio level history bar
- Windows 7® compatible
- Remotely start & stop recordings
- Central monitoring of independent recordings

FTR Monitor is uniquely designed with built-in safeguards that make centralized recording reliable and risk free. Audio (and video, if desired) are recorded independently in each room, thus lowering the risk of system wide failure.

With FTR Monitor, users can remotely start and stop recording at selected locations, playback content from specific venues and create electronic notes while listening to recordings from each. Each note is automatically time-stamped with a hyperlink to the associated recording, thus enabling users to instantly access content at the *exact point* where each note was taken. When used with the FTR Reporter™ digital recording solution, this application offers the alternative to lower operational costs by having one person remotely control the recording process for multiple rooms.

Tangible Benefits of FTR Monitor

Convenience, Flexibility & Ease of Use

- Compact views of Log Notes & Player
- Control recordings centrally or on a room-by-room basis
- Create linked notes, at your convenience, against pre-recorded content
- Instant access to specific testimony without fast-forwarding and rewinding tapes

Reliability & Lower operational costs

- Protection against system-wide failure
- Replay & back-annotation capability prevents loss of notes
- Centralized monitoring & remote start/stop removes need for in-room operator

With FTR Monitor, courthouses can streamline the recording and annotation process for multiple courtrooms and gain the efficiency of a centralized control solution. Quite simply, it is the most complete and effective solution for central monitoring environments.

Recommended System Requirements

Version 5.5

Operating System Compatibility:

- Windows® XP Professional SP3
- Windows Windows® 7 Professional / Ultimate SP1 32-bit or 64-bit

Recommended System Requirements:

- CPU: Intel® Core™ i5 Processor or equivalent
- Memory: 4GB
- Display: 1024x768
- Windows compatible stereo sound card

NOTE: As with any software there are hardware and software requirements which need to be in place prior to installing and using FTR software. While this list shows the recommended system requirements, it is important to be aware that using additional programs may require a higher specification. For advice on the suitability of a specific system configuration, please contact FTR sales.

Windows is a registered trademark of Microsoft Corporation in the United States and other countries.

How FTR Monitor helps your court function more efficiently

Court Administrators

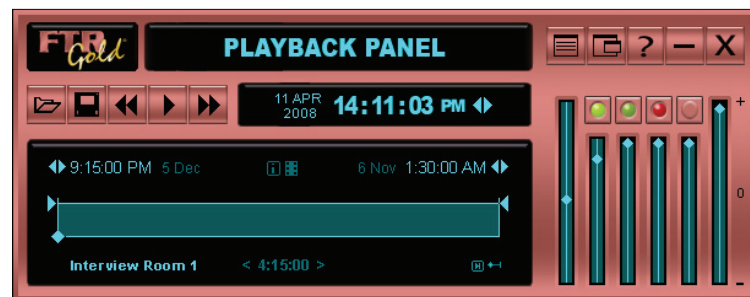

- Simple installation & configuration
- Monitor multiple courtrooms simultaneously
- Protect against system-wide failure & minimize downtime
- Lower operational costs by centralizing monitoring functions
- Streamline recording & annotation process for multiple courtrooms

Court Clerks & Electronic Court Reporters (ECR)

- Monitor recordings centrally or in individual courtrooms
- Save time by using Word Lists & Quick Notes for repetitive text entry
- Instantly access information without rewinding & fast-forwarding tapes

Judges & Hearing Officers

- Instantly access any segment of testimony
- Make personal & private notes during trials & hearings
