

For **The Record**

Gain true clarity with FTR Gold 5.7

HD audio and video recording

FTR Software: 65 Countries | 50 US States | 27,000 Installations

Hear (and see) **clearly**

FTR Gold 5.7 lets you capture and manage the record using the latest digital audio and video technology.

When you're making decisions that impact someone's livelihood or freedom, you've got to be certain. FTR Gold 5.7 helps you catch every word with its class-leading HD audio and video capabilities. From no-fail recording, easy annotation, security and access, you'll have everything you need to transform your courtroom recording operations.

Do more **with digital**

FTR Gold 5.7 provides a suite of intuitive tools to capture, use and manage courtroom recordings.

From a single courtroom to multiple courthouses across a city or state, court reporters and end users experience a new, digital way of working; fast, accurate and flexible. And with FTR Gold 5.7, you can now achieve broadcast-quality audio and video recordings while keeping file sizes manageable.

Record	Annotate	Secure	Playback
Record up to eight channels of broadcast quality, audio and video recordings, and hear how a recording will actually sound as it's being made. Industry-defining audio and video support ensures a smooth technical experience, while simultaneous archiving and backup keep your recordings reliable and secure.	Take the guesswork out of recalling and locating critical moments for playback. Add time-stamped, searchable information such as participants/appearances, spellings and key terminology so there's no doubt about who spoke or when a sidebar was called. Minute-taking and recording notes are simple, and for ultimate efficiency, use keyboard shortcuts for commonly referenced events or create your own.	Ensure the record is appropriately managed by implementing practical safeguards your whole operation can use. You can seal and unseal sensitive recordings (on the fly or after the fact), convert file formats, encrypt content, and apply access controls. Choose from five editions to provide the right level of functionality for your court.	Have complete control during playback of an audio or video recording with our industry leading transcription player. You can isolate individual audio channels, adjust microphone volumes and speech speed, and easily differentiate who's speaking. It even supports USB foot pedals for additional ease of use.

Manage content, workflows and transcription **production**

Create a truly connected digital courtroom operation by integrating FTR Gold with FTR's Court.fm™ and Transcript Express™.

It's nothing short of a digital revolution: a central online environment with everything users need. Easy access to recordings; fast, accurate transcripts, and secure playback anywhere, anytime. Visit www.fortherecord.com/courtfm/ and www.fortherecord.com/products/transcript-express/ for more information.

What's new?

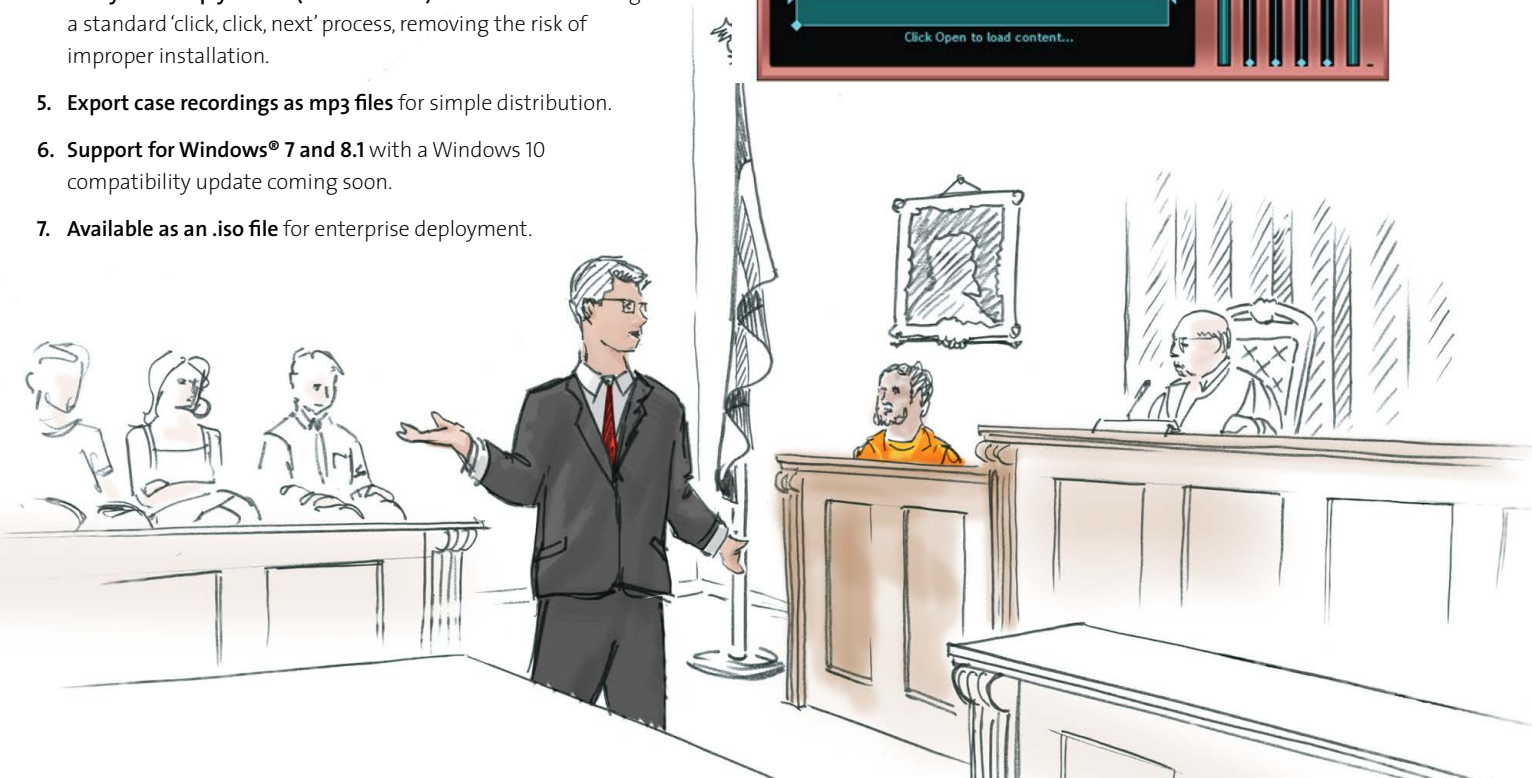

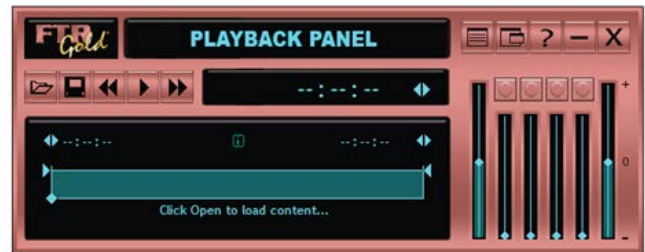

FTR Gold 5.7 provides enhancements where it matters most: audio and video quality with manageable file sizes. Here's what's new:

1. **Capture HD recordings** with up to eight channels of HD audio (with five compression rates to choose from) and up to four channels of HD 1080p video, with better quality and smaller file.
2. **Access knowledgeable support and receive new releases** with FTR Support + Software Assurance included with each FTR Gold 5.7 Recording Suite subscription purchase and 1 year standard support offered FREE with all perpetual licenses.
3. **Try before you buy** with a free trial for all users.
4. **Easily and simply install (and uninstall)** the FTR Gold 5.7 using a standard 'click, click, next' process, removing the risk of improper installation.
5. **Export case recordings as mp3 files** for simple distribution.
6. **Support for Windows® 7 and 8.1** with a Windows 10 compatibility update coming soon.
7. **Available as an .iso file** for enterprise deployment.

System requirements
