

Audio and video recordings moved on demand and on schedule.

LiveCopy™ quickly distributes FTR recordings from the recording location to the transcriber or archive location. It is the only software on the market that offers the flexibility of moving FTR audio recordings to anywhere in the world while the recording is still being made. Clients successfully leverage FTR LiveCopy™ to counteract supply/demand fluctuations and deliver transcripts on time, while unlocking the value of a geographically dispersed, decentralized workforce.

FTR LiveCopy™ is the perfect tool for courts and court reporting firms wanting to provide same day final transcripts to their clients, or gain greater control over the distribution of production content.

Benefits

- Achieve greater efficiency by making targeted transfers that you and your team can track and trace in real time.
- Make a copy, leaving the original untouched, so your established data retention processes are unaffected.
- Send transcribers digital audio/video files plus the log note with a delay of only seconds - from anywhere in the city, county, state or even country.
- Improve productivity by automating transfers for one or multiple courtrooms quickly and easily.
- Self-host on your own infrastructure or we can manage your FTR LiveCopy™ instances in the Cloud.

Key Features

- Powerful scheduling to automate transfers
- Instant replication and movement of files (on-site and off-site) even whilst they are being recorded
- Simple but powerful interface
- Built from the ground up to make FTR recordings easier to access and use
- Designed around the court reporting life cycle

For **The Record**

Works with

- **FTR Gold™**, the industry standard in multi-channel digital audio/video court recording.
- **FTR Gold Server™** lets your organization move towards a centralized recording model, effectively leveraging server hardware technology to capture audio feeds from up to 16 individual rooms on a single server.
- **FTR Player™** lets you use the record as it was intended with full control over microphone volume, speech speed and foot pedal support.
- **Court.fm™** makes your recordings accessible online only seconds behind the spoken word. Unlike traditional streaming technologies which only let you listen live, content published using Court.fm is available for as long as you want, so you can play and replay recordings on any device, anywhere, anytime.

Minimum System Requirements

- Windows® 7 and above.
- Intel® Core™ i5 Processor or equivalent with at least 4GB RAM.
- Display: 1024x768 or higher.
