

## Fully featured annotation and search for FTR recordings.

FTR Log Notes™ allows digital record users to create a time driven interactive map of the recording. There's no more guessing who spoke when or when a sidebar was called - you can see it in black and white or differentiate speakers by color.

FTR Log Notes™ is the easiest way to provide court reporters and stakeholders with clarity over a recording event. It allows users to annotate key in-room events as they happen and provide your stakeholders with interactive links to those events - across the entire FTR platform. The standalone operation even allows log notes to be created after the event without the operator needing to be in the courtroom.

## Benefits

- Create meaningful, searchable metadata for digital recordings. Log Notes™ provide users with information critical to an accurate transcript - such as appearances, spellings and key terminology - and presents it clearly in a timeline of events.
- Create fully featured, customizable (individual or enterprise) hot keys for your most commonly referenced events and replace monotony with efficiency in annotation.
- Save time searching for events with one click playback from timestamps - timestamps jump you to the exact point in the associated recording where the note was taken.

Time	Speaker	Note
10:46:41 AM	His Honour	Thank you Mrs Tan
10:47:07 AM	Mrs Tan	You're welcome your honour
10:48:19 AM	His Honour	Can you please describe the events of the evening
10:49:00 AM	Mrs Tan	On the evening of the 19th
10:49:44 AM	His Honour	Thank you Mrs Tan, do you have something to say Mr Jones
10:50:06 AM	Mr Jones	No your honour

One-click playback from timestamps

## Key Features

- Customizable hot key powered event creation
- One-click playback to key points
- Standalone or with FTR Gold™
- Automated timestamp recording linking
- Adjustable columns for speaker ID and notes
- Export to HTML
- Works on Windows® 7 and above

For **The Record**

## Works with

- **FTR Gold™**, the industry standard in multi-channel digital audio/video court recording.
- **FTR Gold Server™** lets your organization move towards a centralized recording model, effectively leveraging server hardware technology to capture audio feeds from up to 16 individual recording rooms on a single server.
- **FTR Manager™** introduces the concept of sealing and unsealing recordings across your sites and allows users the ability to lockdown access to sensitive recordings. Includes FTR file format converter.
- **FTR Player™** lets you use the record as it was intended with full control over microphone volume, speech speed and foot pedal support.
- **Court.fm™** makes your recordings accessible online only seconds behind the spoken word. Unlike traditional streaming technologies which only let you listen live, content published using Court.fm is available for as long as you want, so you can play and replay recordings on any device, anywhere, anytime.

## Minimum System Requirements

- Windows® 7 and above.
- Intel® Core™ i5 Processor or equivalent with at least 4GB RAM.
- Display: 1024x768 or higher.
- CD or DVD recordable drive or network for access to and saving of log sheets.
