

## Securely and efficiently manage the record.

FTR Manager + FTR Warehouse™ enables courts to easily manage content conversion, storage and access throughout the enterprise.

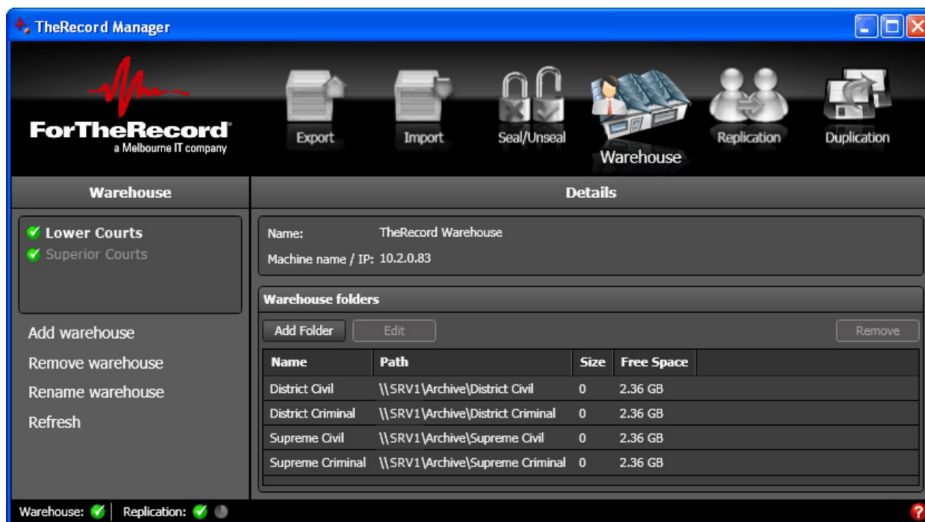

The combined solution facilitates responsive search and browse capabilities using client/server technologies, meaning users across an organization can access relevant FTR content within seconds.

## Benefits

- Automate your recording schedule.
- Search and retrieve content fast.
- Manage users and control how they can use FTR products.
- Centrally manage your recorders and replication.
- Save time by centrally configuring replication from multiple recorders.
- Centrally manage how sensitive recordings are stored and seal them for access by 'need to know' users only.
- Check usage information of courts.

## Key Features

- Automated recording scheduling
- Group policy driven user management
- Centralized file replication management
- Automatic duplication of content
- High speed enterprise-class recording search and retrieval
- Detailed statistical reporting

For **The Record**

## Works with

- **FTR Gold™**, the industry standard in multichannel digital audio/video court recording.
- **FTR Gold Server™** lets your organization move towards a centralized recording model, effectively leveraging server hardware technology to capture audio feeds from up to 16 individual rooms on a single server.
- **FTR Player™** lets you use the record as it was intended with full control over microphone volume, speech speed and foot pedal support.

## Minimum System Requirements

System requirements vary. Please contact us for assistance.

## Features of FTR Manager + FTR Warehouse™

- Decrypt recordings encrypted with FTR Manager.
- Convert files to WMA format.
- Save content to CD/DVD or USB media.
- Convert to data, CD audio or DVD video formats.
- Replicate content to a network folder or a warehouse.
- Split channels in a multi-channel recording.
- Convert to WMF, MP3, AVI, single file (CM/ECF) or audio-only formats.
- Dual archiving to CD/DVD and network/warehouse.
- Migrate/restore content to/from CD/DVD or network.
- Real-time and post sealing of recordings to CD/DVD, network or warehouse.
- Redact confidential log notes when unsealing.
- Encrypt copies of select recordings and log sheets.
- Excellent search response times, even across a network.
- Recorder usage reports.
- Remotely configure archive destinations of individual recorders.
- Migrate/restore content to/from warehouse.
- Automatic export to single file (CM/ECF) format.
- Automatic duplication to MP3, AVI, WMF or audio-only TRM formats.
