

Enhanced ease, robust reliability and powerful functionality

Capture and manage the court record using the latest digital technology with the new FTR Gold™ Recording Suite.

From high fidelity audio and HD video recording, easy annotation, advanced storage and access, FTR Gold™ Recording Suite, with FTR Reporter™, FTR Manager™ and FTR Player™ has everything you need to record with confidence.

Includes

- FTR Reporter™
- FTR Player™
- FTR Manager™

Benefits

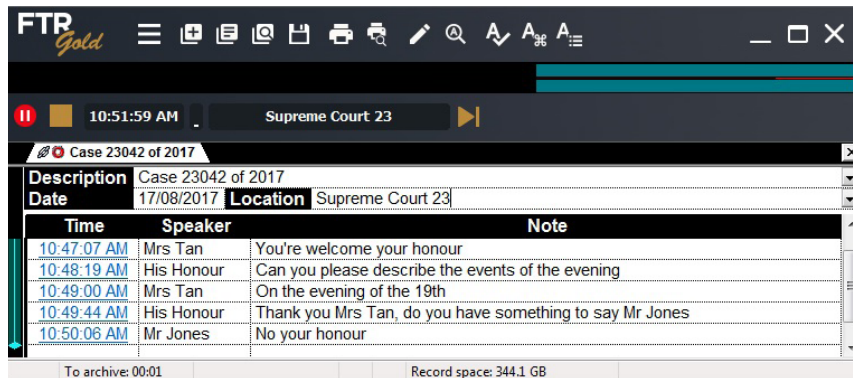

- Record every word with eight-channel high fidelity audio and HD video digital court recording capabilities.
- Use and install with ease with an updated modern interface (with the option to use the classic design), and a new installer including the ability to silently install and deploy the FTR Gold™ Recording Suite and uninstall previous versions of FTR Reporter (5.6 and above) and the FTR Gold™ Recording Suite (5.7 and above).
- Never miss a thing with faster recording start-up and automatic detection and alerts for loss of signal and low audio levels based on ambient noise levels.
- Take the guesswork out of recalling and locating critical moments for playback. Mark important events, create quick notes and insert time stamps for information such as participants/appearances, spellings and key terminology. Even create log notes remotely after the event.
- Enjoy even more flexibility with integration with case management systems and increased compatibility with a wider range of networked and USB audio interfaces, and IP cameras.
- Manage your recorded content - seal and unseal sensitive recordings (on the fly or after the fact), convert file formats, apply access controls, and import other content into your FTR environment.
- Better manage and provide access to recordings with configurable save destinations to suit multi-jurisdictions and archiving in line with relevant retention policies.
- Complete department specific recording while retaining your existing FTR directory structure.
- Save to optical devices with ease and have the flexibility to choose the resolution while formatting a .trm file to Windows Media Format to manage the file footprint.
- See audio and video simultaneously, and re-open files from where you left off during playback.
- Identify speakers accurately during annotation with improved contrast between channels, more time, and enhanced sensitivity to quieter signals.

For **The Record**™

Minimum System Requirements

- Windows® 7 and Windows® 10.
- Intel® Core™ i7 processor equivalent or higher with 8GB RAM.

The screenshot shows the FTR Reporter software interface. At the top, there is a menu bar with various icons. Below it, a status bar displays the time '10:51:59 AM' and the case name 'Supreme Court 23'. A window titled 'Case 23042 of 2017' is open, showing a table with columns for 'Time', 'Speaker', and 'Note'. The table contains five rows of data. At the bottom of the window, there are fields for 'To archive: 00:01' and 'Record space: 344.1 GB'.

| Time | Speaker | Note |
|-------------|------------|--|
| 10:47:07 AM | Mrs Tan | You're welcome your honour |
| 10:48:19 AM | His Honour | Can you please describe the events of the evening |
| 10:49:00 AM | Mrs Tan | On the evening of the 19th |
| 10:49:44 AM | His Honour | Thank you Mrs Tan, do you have something to say Mr Jones |
| 10:50:06 AM | Mr Jones | No your honour |
